Users CRUD

-  Learning Objectives:
- Students will connect Flask to a database.

Students will create full CRUD actions with database.

☐ Use the same Flask project from the Users CR assignment

- ☐ On the Read (All) page add an Actions column
- ☐ Show link will render the Users Read (One) page
- ☐ Edit link will render the Users Edit page
- ☐ Delete link will delete the User from the database, and redirect to the Read (All) page
- ☐ After successful creation of a new User, redirect to Read (One) page
- ☐ Read (One) page will display the User's information
- ☐ Read (One) page to have Edit and Delete links
- ☐ Edit page will have a form pre-populated with the users information
- ☐ Update the updated_at field when editing the User's information
- ☐ After successful update of user, redirect to the Read (One) page and display the updated information
- ☐ All Home links should redirect to the Read (All) page
